

## Voluntary Use of Respirator Request Form

Employees may voluntarily use a respirator during activities for which Environmental Health and Safety does not present a hazard. You should do the

following to ensure that you know how much it will protect you.

Do not use a respirator in atmospheres containing contaminants that your respirator is not designed to protect. A respirator designed to filter dust particles will not protect you against gases, vapors, or very fine mists or smoke.

Do not use a respirator so that you do not mistakenly use someone else's respirator.

Respirator users must complete annual [online training](#) via myHR Learn.

---

### Medical Evaluations

Employees who voluntarily use a respirator (except for disposable filtering facepiece respirators such as N-95s) must complete a medical clearance questionnaire evaluation to determine whether they can safely use a respirator. Please contact EHS at [ehs@natafeli.com](mailto:ehs@natafeli.com) or call 313-395-2100 (ext. 3952) for more information.
